

Körnerpick Profi Breeding Plus

Tiivisteet

Complementary feed for chick and poul

Körnerpick Profi Breeding Plus completes the specific demand of young chick, to avoid high losses during the rearing period of chicken, ducks and goose. Especially in the first weeks of life, the supply of relevant nutrients such as vitamins (B-complex, A, D and E) and trace elements (manganese and zinc) are important for the chick's development.

A big challenge in this context is the not finally developed gut flora of young animals. Particularly stress or infections can lead to developmental disorders of the microbiom, which causes problems in digestion and intestinal absorption of nutrients. Furthermore it can result in a weakened immune system, as 70% of the chick's immune cells are located in the intestine.

Not every chick is able to compensate these problems with deficiency symptoms and / or insufficient immune defense what possibly causes losses in the breeding flock. For this reason the additional feeding of special concentrates like Körnerpick Profi Breeding Plus, help to strengthen young chick in growth, gut development and immune defence.

Our chick feed Körnerpick Profi Breeding Plus is based on 3 pillars:

- 1) Concentrated Vitamins and Trace Minerals for the ideal nutrition of young chick
- 2) Probiotic Bacteria support a sound and balanced development of gut flora and immune system
- 3) Essential Oils from Cinnamon and Oregano stimulate a balanced microbiom and have got appetizing effects

Feeding recommendation:

Within the first 14 days, we recommend to feed Körnerpick Profi Breeding Plus daily and reduce the feeding intervall afterwards to 2-3 times per week until the age of 6 weeks.

Day 1-14: 25g (approx. 4 heaped tablespoon) per 1kg of feed or 1 L drinking water.
From day 15: 2-3 x per week per 1kg of feed or 1 L drinking water.

If you add Körnerpick Profi Breeding Plus to drinking water, some insoluble sediments can be left on the bottom of the drinking trough. This does not affect feed properties.

Körnerpick Profi Breeding Plus is a complementary feed which contains higher amounts of Vitamin A and trace elements according to complete feed. So the feed intake for chick and poul has to be limited according to the feeding recommendation above.

Raaka-aineet: Maltodextrin, rypälesokeri, Whey powder (partially desugared, partially demineralized), natriumkloridi, Sodium bicarbonate

Ravintoaineet: 1,9 % Raakavalkuainen, 0,06 % Raakarasva, 0,2 % Raakakuitu, 9,1 % Tuhka, 1,67 % Natrium, 0,02 % Metioniini, 0,09 % Lysiini

Lisäaineet per kg: 200.000 I.E. A-vitamiini (3a672a) ^{NA}, 50.000 I.E. D3-vitamiini (3a671) ^{NA}, 150 mg Vitamin B1 (3a820) ^{NA}, 300 mg B2-vitamiini (3a825i) ^{NA}, 6.500 mcg B12-vitamiini syanokobalamiini ^{NA}, 1.000 mg Vitamin C (3a300) ^{NA}, 250 mg E Vitamiini (3a700) ^{NA}, 5.000 mg Koliinikloridi (3a890) ^{NA}, 650 mg Niacinamid (3a315) ^{NA}, 150 mg Kalsium-D-Pantotenaatti (3a841) ^{NA}, 500 mg Vitamin K3 (3a710) ^{NA}, 1.280 mg Mangaani (3b503) Mangaani(II)sulfaatti, monohydraatti ^{NA}, 750 mg Glysiinin sinkkikelaattihydraatti (kiinteä) (3b607) ^{NA}, 2×10^{10} KBE Bacillus subtilis C-3102 (DSM 15544) (4b1820) ^{ZA}, 300 mg Zimtaldehyd (Flavis No.05.050) ^{SA}, 300 mg Carvacrol (Flavis No. 04.031) ^{SA}, 120 mg Capsicum oleoresin (CoE 108) ^{SA}
